Walkthrough Over Working with Digital Transaction System

Pawas Goyal

Introduction

Mutual Fund companies handle several heavy transaction in a day .The whole business depends upon these transactions. And the RM,RH,investors-companies and individuals, brokers, distributors and different banks are involved in the process.

In order to identify the transaction details from an investor in Mutual fund account, track them on a timely basis (ie before 3PM everyday) and provide them Credit confirmation defined process needs to be followed which includes:

Bank Statements downloads from different banks. Process of email and fax transactions confirmation by giving confirmation in terms of timestamp. Inflow outflow /transactions/Trigger and other reports

This whole process of checking the daily transactions, checking the credits is done manually in most of the Mutual Fund companies.

To reduce this cumbersome and repeated manual work, we have developed a solution called Digital Transaction System (DTS).

What is DTS

Digital Transaction System is a utility that handles all the transaction processing occurring in mutual fund companies.

DTS works on daily basis and handles all the transaction related data

DTS ensures that every transaction is taken care and logged into system

Flexible to Choose your Investment

Digital Transaction System Online

Digital Transaction System On Premises

Are You Ready to Cloud??

OR

Do you want to invest more??

The Power of DTS...

But...

List does not end Here

Because....

It is Rich of Out of The Box Features

Quick Find Search

Helps users to find their records easily across entities

Built-in Workflow/Processes

Facilitate end users to define their own business process

Outlook Synchronization

Provides Email, Appointment, and Contact synchronization

Hierarchy Visualization

Viewing records is more comfortable with visualization

Team Collaboration

Sharing records is easy, keeping update is trouble-free

Role-Based Security

Access what you need to access, see what you need to see

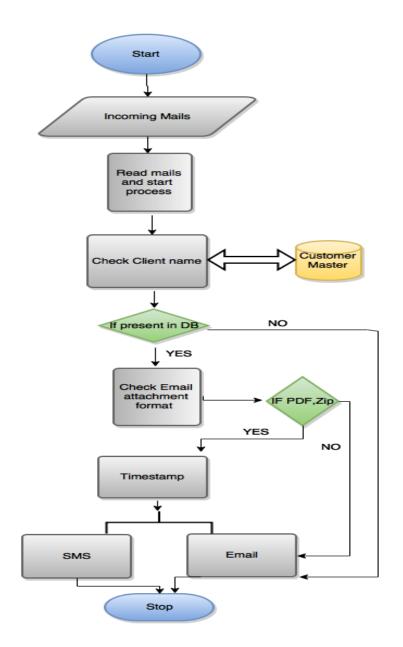

Transactions

Walkin/Email /Fax acceptance Timestamping Unregistered transactions Confirmation of transactions

Email Transactions

Allows you to receive transactions via Email.

Transaction Acceptance
Transaction Processing
Transaction Confirming

Unregistered Transactions

When any unregistered transaction is received in the system, it directly goes to Unregistered transaction screen. Where user can identifies the transactions select client name or distributer name and update the record .on clicking on "Confirm" a alert message will be displayed that – This Fax /Email no is not present in the database do you want to update the no in DB. If user clicks on YES, the Fax no/Email will be updated in the database against the selected customers name. So next time if FAX /Email comes from this no, it will not be unregistered.

Unregistered transaction -Screen

Bank Statements

Download statements (web scripting/Email/Manual)
Process statements
Check credits

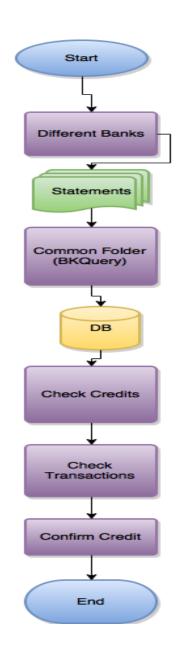

Bank Statements from all the different Banks are downloaded by the utility (Web Scripting, Email Integrations and Manually put in shared folder) The module helps in tracking transactions in various banks

All the statements are in different format ie pdf, excel or csv file.

Utility synchronizes the documents, collects the information and put them in Database.
All the transaction are then available on the web through database, on the transaction screen
