Case Study – ERP for Steel Ball Manufactures

The Client

Client owns Group of companies is a family owned group established since the 1979. The group has been manufacturing steel balls, Taper roller bearing, taper Roller and cylindrical rollers for some of the leading industries in the 21st generation with cutting edge technology and with a will to serve the best quality products and services.

The Challenges

The Company required cutting edge technology for their manufacturing processes when they approached Cylsys Software. Their internal manufacturing units were meeting target numbers, but to compete in the domestic and international market, the quality of their products like steel balls had to be exceptional. This was only possible by incorporating Technology in the entire process. The brief to Cylsys was to build an ERP which would streamline the entire process. The challenge was this assignment was first of its kind in the Manufacturing industry which Cylsys Software would undertake.

How did Cylsys help

Cylsys Software delivered exceptional results in this project thought it was its first in the Manufacturing industry.

For Steel Balls, they manufacture steel balls in different sizes and for this, Cylsys designed and developed an ERP which streamlined the whole process. Our ERP gives an accuracy of size, counts of units, quantity of materials and the duration of preparation. Our ERP has the masters as per requirements and gives reports for their quality analysis. Our ERP has resolved their whole manual work wherein they had to manually jot down the process and use excess manpower too. Apart from this, Cylsys Software has also deployed our Tech resources in both the units of the client group to support the process and maintain the ERP on a regular basis.

The Outcome

Today, the entire manufacturing process has become seamless and streamlined. There is no concern about the quality of the product being manufactured which is such a relief to such a huge manufacturing unit. The ERP created by Cylsys Software keeps a track from Order booking till order dispatch. It has automated the entire Order to cash management process. Therefore the management is focused on scaling up production volumes and entering new markets , staying one step ahead of the competition.

Our Clients

We have worked with the following clients on different modules based on the requirements.

I do hope that this information will help you gain a clear idea of what we can offer, and that we can become a recognized vendor for your organization.
